

Opteon™ YF

R-1234yf Refrigerant

Opteon™ YF

with UV Leak Detect

- Quickly find A/C system leaks and minimize repair times
- Verify system repairs
- Eliminates need for secondary UV Dye injection step
- Available in 10lb cylinders, 25lb cylinders or 12oz cans

From the makers of Freon™
An OEM preferred supplier

Keeping cars cool for nearly 100 years

Opteon™ YF (R-1234yf) Refrigerant with UV Leak Detect helps save mobile A/C professionals and DIYers time and money by replenishing lost refrigerant to increase A/C system cooling and enabling the detection of refrigerant leaks, facilitating efficient diagnostics and repair.

Opteon™ YF is as easy to use and cools as effectively as R-134a, but with 99.9% less global warming potential (GWP). Since 2015, R-1234yf has been widely adopted by automotive OEs globally for use in new vehicles. Made in the USA, Opteon™ YF with UV Leak Detect contains a high-technology dye formulation that meets the stringent requirements of SAE J2297 and AHRI700. The dye has been approved and used by OEs, dealer service networks, and independent service shops for years.

Add Opteon™ YF with UV Leak Detect to a mobile A/C system that does not contain any dye, start up the compressor, and let the dye do the work for you. The dye mixes with the lubricant and is quickly distributed through the system and helps to identify leaks in no time!

All the Refrigerant You Need, from One Trusted Source

DIY Products

R-1234yf Refrigerant
1234YF Refrigerante
12 oz, 16 oz, and 28 oz cans

R-1234yf Refrigerant with Charging Hose
1234YF Refrigerante con manguera de carga
12 oz can

R-1234yf Refrigerant with Leak Detect
1234YF Refrigerante con detector de fugas
12 oz can

Commercial Products

R-1234yf Refrigerant Cylinder
1234YF Cilindro de refrigerante
10 lb and 25 lb cylinder

R-1234yf Refrigerant Cylinder with Leak Detect
1234YF Cilindro de refrigerante con detector de fugas
10 lb and 25lb cylinder
